<b>Remarks</b>	<p>1. <u>At the time of visit, the property was in dilapidated condition, Hence Internal Site Inspection could not be taken.</u></p> <p>2. <u>As per documents, the land is partly freehold and partly Lease hold. Legal Opinion should be taken regarding lease hold land area and it's leasehold rights if taken for fresh mortgage rights.</u></p> <p>3. <u>As per agreement, the Structure was constructed prior to 1950 which was Wooden Structures but as per site visit, it is R.C.C Framed Structure. The documents for reconstruction of existing structure were not provided for verification and the structure is in dilapidated condition hence only salvage value is considered for the purpose of valuation.</u></p>		

**Justification for price /rate**

The Market Value of the property is based on facts of markets discovered by us during our enquiries, however the government rate value in this case is less than the market value arrived by us. We are of the opinion that the value arrive by us will prove to be correct if an Auction of the subject property is carried out. As far as Market Value as per property document is concerned, it is not possible to comment on same, may be government rates are fixed by sampling during same point of time in part and whereas, Market values change every month.

In most of the cases the actual deal amount or Transaction value is not reflected in the property documents because of various Market practices. As Valuer, we always try to give a value which is correct reflection of actual transaction value irrespective of any factors in market.

## **Method of Valuation / Approach**

Land cost can be estimated using the Sales Comparison Approach by studying recent sales of land close to the subject property, and these sales should be comparable in size and location with subject property.

There are different ways to estimate replacement costs, the most common being finding out the cost to build a square foot of comparable properties multiplied by the total square footage of the building. The cost approach is commonly used for Residential House, Industrial Building and properties mentioned above.

As the property is Residential land and building thereof, we have adopted Cost approach / Land and Building Method for the purpose of valuation. The Price for similar type of property in the nearby vicinity is in the range of ₹ 7,500/- to ₹ 8,500/- per Sq. Ft. for land Considering the rate with attached report, current market conditions, demand and supply position, Land size, location, sustained demand for residential Plot, all round development of commercial and residential application in the locality etc. We estimate ₹ 8,000/- per Sq. Ft. for Land Rate with appropriate cost of construction for valuation.

The salability of the property is: Good (For Land only)

Expected rental values per month: N.A.

Any likely income it may generate: N.A.

### Valuation Methodology

For the purpose of this valuation exercise, the valuation methodology used is Direct Comparison Approach Method and proposed Current Use / Existing Use premise is considered for this assignment.

The Direct Comparison Approach involves a comparison of the property being valued to similar properties that have actually been sold in arms - length transactions or are offered for sale. This approach demonstrates what buyers have historically been willing to pay (and sellers willing to accept) for similar properties in an open and competitive market and is particularly useful in estimating the value of the land and properties that are typically traded on a unit basis.

In case of inadequate recent transaction activity in the subject micro-market, the appraiser would collate details of older transactions. Subsequently, the appraiser would analyse rental / capital value trends in the subject

micro-market in order to calculate the percentage increase / decrease in values since the date of the identified transactions. This percentage would then be adopted to project the current value of the same.

Where reliance has been placed upon external sources of information in applying the valuation methodologies, unless otherwise specifically instructed by Client and/or stated in the valuation, VCIPL has not independently verified that information and VCIPL does not advise nor accept it as reliable. The person or entity to whom the report is addressed acknowledges and accepts the risk that if any of the unverified information in the valuation is incorrect, then this may have an effect on the valuation.
