The cost approach is a Real Property Valuation method which considers the value of a property as the cost of the land plus the replacement cost of the building (construction costs) minus the physical and functional depreciation.

This approach is most commonly used for real estate properties that are not easily sold like schools, hospitals, and government buildings.

Land cost can be estimated using the Sales Comparison Approach by studying recent sales of land close to the subject property, and these sales should be comparable in size and location with subject property.

There are different ways to estimate replacement costs, the most common being finding out the cost to build a square foot of comparable properties multiplied by the total square footage of the building. The cost approach is commonly used for Residential Bungalow, Industrial Building and properties mentioned above.

As the property is anindustrial land and building thereof, we have adopted Cost approach /Land And Building Method for the purpose of valuation. The Price for similar type of property in the nearby vicinity is in the range of 25,000/- to 28,000/- per Sq. M. for land Considering the rate with attached report, current market conditions, demand and supply position, Land size, location, sustained demand for industrial building / Plot, all round development of commercial and industrial application in the locality etc. We estimate `26,500/- per Sq. M. for Land including land development with appropriate cost of construction for valuation.

The saleability of the property is: Normal

Likely rental values in future in: N.A.

Any likely income it may generate: N.A

SANJAY S. DAL

#### JUSTIFICATION FOR PRICE / RATE

The Market Value of the property is based on facts of markets discovered by us during our enquiries, however the government rate value in this case is less than the market value arrived by us. We are of the opinion that the value arrive by us will prove to be correct if an Auction of the subject property is carried out. As far as Market Value in is concerned, it is not possible to comment on same, may be government rates are fixed by sampling during same point of time in part and whereas, Market values change every month.

In most of the cases the actual deal amount or Transaction value is not reflected in Index II because of various Market practices. As Valuer, we always try to give a value which is correct reflection of actual transaction value irrespective of any factors in market.

We hope this will satisfy your requirements. As a result of my appraisal and analysis, it is my considered opinion that the Fair Market Value of the above property in the prevailing condition with aforesaid specification Rs. 1,37,25,000/- (Rupees One Crore Thirty Seven Lakhs Twenty Five Thousand Only). The Realizable Value of the above property is Rs. 1,23,52,500/- (Rupees One Crore Twenty Three Lakhs Fifty Two Thousand Five Hundred Only) and The Distress value Rs. 1,09,80,000/- (Rupees One Crore Nine Lakhs Eighty Thousand Only)
