Justification for price / rate

The Market Value of the property is based on facts of markets discovered by us during our enquiries, however the government rate value in this case is less than the market value arrived by us. We are of the opinion that the value arrive by us will prove to be correct if an Auction of the subject property is carried out. As far as Market Value in Property documents is concerned, it is not possible to comment on same, may be government rates are fixed by sampling during same point of time in part and whereas, Market values change every month.

In most of the cases the actual deal amount or Transaction value is not reflected in Property documents because of various Market practices. As Valuer, we always try to give a value which is correct reflection of actual transaction value irrespective of any factors in market.

Valuation Methodology

For the purpose of this valuation exercise, the valuation methodology used is Direct Comparison Approach

Method and proposed Current use / Exiting use model is used for analysing development potential.

properties that have actually been sold in arms - length transactions or are offered for sale. This approach

The Direct Comparison Approach involves a comparison of the property being valued to similar

demonstrates what buyers have historically been willing to pay (and sellers willing to accept) for similar

properties in an open and competitive market and is particularly useful in estimating the value of the Office and

properties that are typically traded on a unit basis.

In case of inadequate recent transaction activity in the subject micro-market, the appraiser would collate

details of older transactions. Subsequently, the appraiser would analyse rental / capital value trends in the

subject micro-market in order to calculate the percentage increase / decrease in values since the date of the

identified transactions. This percentage would then be adopted to project the current value of the same.

Where reliance has been placed upon external sources of information in applying the valuation

methodologies, unless otherwise specifically instructed by Client and/or stated in the valuation, VCIPL has not

independently verified that information and VCIPL does not advise nor accept it as reliable. The person or entity

to whom the report is addressed acknowledges and accepts the risk that if any of the unverified information in the

valuation is incorrect, then this may have an effect on the valuation.
