These imperfections are inherent in natural marble and should be regarded as their natural beauty. Italian Marble (If applicable) when sourced at the mines occurs in a cracked texture and is imported in the form of blocks. These blocks are sliced mechanically and the cracks are filled with resin fillers at the marble processing unit. These marble slabs are then reinforced with PVC mesh on one side to avoid development of cracks during long distance travel and handling. Though utmost care is taken, sometimes, these cracks open during cutting and fixing. Such cracks are filled again with the best imported resins as used internationally. The difference in shade/design depends on the natural occurrence in different types of marble. While the Promoter will try to limit use of one lot in one confined area/room, the same may not match with other area/room. In view of the above, allottee agrees that promoter shall not be liable
