Valuation Methodology

The method adopted for valuation of the residential premises is sales comparison method in which the sales instances of the similar properties or properties with similar attributes in the same region are traced and the market rates are derived by using the experience and expertise of the valuer. Also, the valuation of the residential premises is based on the present market value of the premises depending on the condition, location and other infrastructural facilities available at and around the said premises. We have considered the valuation on **Built-up area** for the premises, which is an increase of **20%** over that of its carpet area measured by us at the site the time visit.

The realizable value of the said residential premises is considered at 85% of the present market value of the said premises, while the forced sale value for the said residential premises is considered at 75% of its present market value.

Remarks:

- The said property is 2 BHK residential flat.
- All the civic amenities are available within the proximity of the said building.
- We observe that the guideline value of the said flat is less as compared to its market value.
- We have adopted the sale rate based on our local inquiries and as per prevailing market rate in the vicinity.
- We cannot ascertain any violation in the building as we were not provided with the approved plans of the building.

As a result of our appraisal and analysis, it is our considered opinion that the value of the above referred Flat No. A/203, 2nd Floor, Building No. 4, Lily, Evershine Nagari, Jay Nagar, Vasai Road (East), Taluka Vasai & District Palghar – 401 208 in its present prevailing condition with aforesaid specifications is as under:
