“The Market Value is the estimated amount for which an Asset should exchange on the date of Valuation between a willing buyer and willing seller in an arms length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion”.

This valuation is based on Sales Comparison Method by comparing the prevalent market rate of comparable premises with property under Valuation. The factors which have been considered are size, location, age of building, state of repairs, accumulated depreciation, demand & supply of similar properties, fixtures attach to wall and which cannot be easily removed from civil structure etc.
