GUIDELINE RATE

As per our opinion, due to the following reasons there is difference between market value & amp; guideline value of the property mentioned in report:

- 1. Guideline Value is the minimum value at which the sale or transfer of property can take place. Guideline rates generally do not reflect market value. The rates as fixed by the stamp duty office is only a tax revenue and is in no way determining the fair prevailing market rate and value.
- 2. Market price is the value of asset for a transaction between a seller and buyer which is done at an arm's length principle with the price determined by the market forces of supply and demand.
- 3. Particular amenities & Damp; features are not considered in guideline rates.
- 4. Market value of property may vary from site to site, demand & amp; supply chain, Features & amp; Amenities.
