Remark:		

Justification for price / rate

The Market Value of the property is based on facts of markets discovered by us during our enquiries, however the government rate value in this case is less than the market value arrived by us. We are of the opinion that the value arrived by us will prove to be correct if an Auction of the subject property is carried out. As far as Market Value in Index II is concerned, it is not possible to comment on same, may be government rates are fixed by sampling during same point of time in part and whereas, Market values change every month.

In most of the cases the actual deal amount or Transaction value is not reflected in Index II because of various Market practices. As Valuer, we always try to give a value which is correct reflection of actual transaction value irrespective of any factors in market.

Method of Valuation / Approach

The cost approach is a Real Property Valuation method which considers the value of a property as the cost of the land plus the replacement cost of the Bungalow (construction costs) minus the physical and functional depreciation. This approach is most commonly used for real estate properties that are not easily sold like schools, hospitals, government Bungalows and above type of property.

Land cost can be estimated using the Sales Comparison Approach by studying recent sales of land close to the subject property, and these sales should be comparable in size and location with subject property.

There are different ways to estimate replacement costs, the most common being finding out the cost to build a square foot of comparable properties multiplied by the total square footage of the Bungalow. The cost approach is commonly used for Residential Bungalow, Residential Bungalow and properties mentioned above.

As the property is an Residential land and Bungalow thereof, we have adopted Cost approach / Land and Bungalow Method for the purpose of valuation. The Price for similar type of property in the nearby vicinity is in the range of ₹ 48,000.00 to ₹ 54,000.00 per Sq. M. for land and Structure thereof Considering the rate with attached report, current market conditions, demand and supply position, Land size, location, sustained demand for Residential Bungalow / Plot, all round development of commercial and Residential application in the locality etc. We estimate ₹ 53,000.00 per Sq. M. for Land with appropriate cost of construction for valuation.

Value Subject to Change

The subject appraisal exercise is based on prevailing market dynamics as on **13th Feburary 2025** and does not take into account any unforeseeable developments which could impact the same in the future.

Our Investigations

We are not engaged to carry out all possible investigations in relation to the subject property. Where in our report we identify certain limitations to our investigations, this is to enable the reliant party to instruct further investigations where considered appropriate or where we recommend as necessary prior to reliance. Vastukala Consultants India Pvt. Ltd. (VCIPL) is not liable for any loss occasioned by a decision not to conduct further investigations

Assumptions

Assumptions are a necessary part of undertaking valuations. VCIPL adopts assumptions for the purpose of providing valuation advise because some matters are not capable of accurate calculations or fall outside the scope of our expertise, or out instructions. The reliant party accepts that the valuation contains certain specific assumptions and acknowledge and accept the risk of that if any of the assumptions adopted in the valuation are incorrect, then this may have an effect on the valuation.

Information Supplied by Others

The appraisal is based on the information provided by the client. The same has been assumed to be correct and has been used for appraisal exercise. Where it is stated in the report that another party has supplied information to VCIPL, this information is believed to be reliable but VCIPL can accept no responsibility if this should prove not to be so.

Future Matters

To the extent that the valuation includes any statement as to a future matter, that statement is provided as an estimate and/or opinion based on the information known to VCIPL at the date of this document. VCIPL does not warrant that such statements are accurate or correct.

Map and Plans

Any sketch, plan or map in this report is included to assist the reader while visualizing the property and assume no responsibility in connection with such matters.

Site Details

Based on inputs received from Client's representative and site visit conducted, we understand that the subject property is currently a contiguous and non-agricultural land parcel admeasuring **150.00 Sq. M.** and structures thereof. The property is owned by **Shri. Ganpat Punja Sonawane & Kumari. Purva Sanjay Mali (Alias), Sau. Purva Vikram Sonawane.** Further, VCIPL has assumed that the subject property is free from any encroachment and is available as on the date of the appraisal.

Property Title

Based on our discussion with the Client, we understand that the property is owned by Name of Owner: **Shri. Ganpat Punja Sonawane & Kumari. Purva Sanjay Mali (Alias), Sau. Purva Vikram Sonawane.** For the purpose of this appraisal exercise, we have assumed that the subject property has a clear title and is free from any encumbrances, disputes and claims. VCIPL has made no further enquiries with the relevant local authorities in this regard and does not certify the property as having a clear and market able title. Further, no legal advice regarding the title and ownership of the subject property has been obtained for the purpose of this appraisal exercise. It has been assumed that the title deeds are clear and marketable.

Since 1989

Vastukala Consultants (I) Pvt. Ltd.

An ISO 9001 : 2015 Certified Company

Environmental Conditions

We have assumed that the subject property is not contaminated and is not adversely affected by any existing or proposed environmental law and any processes which are carried out on the property are regulated by environmental legislation and are properly licensed by the appropriate authorities.

Town Planning

The permissible land use, zoning, achievable FSI, area statement adopted for purpose of this valuation is based on the information provided by the Client's representative and the same has been adopted for this valuation purpose. VCIPL has assumed the same to be correct and permissible. VCIPL has not validated the same from any authority.

Area

Based on the documents, we understand that the subject property is contiguous and non-agricultural land parcel measuring **150.00 Sq.M.** and structure thereof.

Condition & Repair

In the absence of any information to the contrary, we have assumed that there are no abnormal ground conditions, nor archaeological remains present which might adversely affect the current or future occupation, development or value of the property. The property is free from rat, infestation, structural or latent defect. No currently known deleterious or hazardous materials or suspect techniques will be used in the construction of or subsequent alteration or additions to the property and comments made in the property details do not purport to express an opinion about, or advise upon, the condition of uninspected parts and should not be taken as making an implied representation or statement about such parts

Valuation Methodology

For the purpose of this valuation exercise, the valuation methodology used is Direct Comparison Approach Method and proposed Highest and Best Use model is used for analysing development potential.

The Direct Comparison Approach involves a comparison of the property being valued to similar properties that have actually been sold in arms - length transactions or are offered for sale. This approach demonstrates what buyers have historically been willing to pay (and sellers willing to accept) for similar properties in an open and competitive market and is particularly useful in estimating the value of the land and properties that are typically traded on a unit basis.

In case of inadequate recent transaction activity in the subject micro-market, the appraiser would collate details of older transactions. Subsequently, the appraiser would analyse rental / capital value trends in the subject micro-market in order to calculate the percentage increase/decrease in value since the date of the identified transactions. This percentage would then be adopted to project the current value of the same.

Where reliance has been placed upon external sources of information in applying the valuation methodologies, unless otherwise specifically instructed by Client and/or stated in the valuation, VCIPL has not independently verified that information and VCIPL does not advise nor accept it as reliable. The person or entity to whom the report is addressed acknowledges and accepts the risk that if any of the unverified information in the valuation is incorrect, then this may have an effect on the valuation.

Not a Structural Survey

We state that this is a valuation report and not a structural survey

Other

All measurements, areas and ages quoted in our report are approximate

Legal

We have not made any allowances with respect to any existing or proposed local legislation relating to taxation on realization of the sale value of the subject property. VCIPL is not required to give testimony or to

appear in court by reason of this appraisal report, with reference to the property in question, unless arrangement has been made thereof. Further, no legal advice on any aspects has been obtained for the purpose of this appraisal exercise

Property specific assumptions

Based on inputs received from the client and site visit conducted, we understand that the subject property is currently vacant and Bank Possession, contiguous and non-agricultural land parcel admeasuring **150.00Sq.M.** and structure thereof.

3. ASSUMPTIONS, CAVEATS, LIMITATION AND DISCLAIMERS

1. We assume no responsibility for matters of legal nature affecting the property appraised or the title there to, nor do we render our opinion as to the title, which is assumed to be good and marketable.
2. The property is valued as though under responsible ownership.
3. It is assumed that the property is free of liens and encumbrances.
4. It is assumed that there are no hidden or unapparent conditions of the subsoil or structure that would render it more or less valuable. No responsibility is assumed for such conditions or for engineering that might be required to discover such factors.
5. There is no direct / indirect interest in the property valued.
6. The rates for valuation of the property are in accordance with the Govt. approved rates and prevailing market rates

(Annexure-II)
