Valuation Methodology

The method adopted for valuation of the residential premises is sales comparison method in which the sales instances of the similar properties or properties with similar attributes in the same region are traced and the market rates are derived by using the experience and expertise of the Valuer. Also, the valuation of the residential premises is based on the present market value of the premises depending on the condition, location and other infrastructural facilities available at and around the said premises. We have considered the valuation on **Built up area** for the premises, which is an increase of 20% over that of its carpet area.

The realizable value of the said residential premises is considered at 90% of the present market value of the said premises, while the forced sale value for the said residential premises is considered at 80% of its present market value.

Remarks:

The said property is 2 BHK Residential flat.

All the civic amenities are available within the proximity of the said building.

We have adopted the sale rate based on our local inquiries and as per prevailing market rate in the vicinity.
